

# TITAN NEWS

December 2013 Edition

## A FIRST LOOK AT TITAN!!

This week, Mid-America Consulting Group presented the Titan Project Steering Committee with a first glimpse of Titan. This issue is dedicated to sharing some of those pictures with you. It's important to note that the final product may have some small changes if we identify any gaps during the testing and conversion phase. However, the Titan team wanted to share the excitement of the coming product and our commitment to keeping everyone involved in the creation of this important tool for DIDD!

## THE DASHBOARD

The screen to the left is called the dashboard. The dashboard is where users will start every time a user logs in to Titan. Your dashboard will be customized based on your role, so this is just an example. Many users will also have the ability to further customize their dashboards. Please note, you will only have access to the functions and data that your role requires. The format may look familiar to you if you use Microsoft Office products.

The photograph on the right demonstrates a screen that will be used to enter information about a person. The system is very intuitive and will be able to assist you in your work. This is the type of application that will be a part of the Service Planning Phase.

## NEXT MONTH'S EDITION

Because of the holidays, the January edition of Titan News will be distributed on January 10th. As always, please email the Titan team at [DIDD.Titan@tn.gov](mailto:DIDD.Titan@tn.gov) with any questions or concerns you may have.
